PUBLIC SCHOOL RETIREMENT SYSTEM OF THE CITY OF ST. LOUIS

MINUTES OF THE BOARD OF TRUSTEES REGULAR MEETING

December 13, 2021

I. ROLL CALL AND ANNOUNCEMENT OF A QUORUM

The December meeting of the Board of Trustees of the Public School Retirement System of the City of St. Louis (PSRSSTL) was called to order at around 4:32 p.m. on Monday, December 13, 2021. The meeting was conducted by video conference through Zoom and a Livestream on YouTube. Louis Cross, Chairman of the Board of Trustees, was the presiding officer.

Roll Call was taken, and Angela Banks, Louis Cross, Sheila Goodwin, Donna Jones, Yvette Levy, Bobbie Richardson, Albert Sanders, Justin Stein, and Dorris Walker were present. The Board of Trustees had a quorum at the meeting. Trustees Christina Bennett and Antionette Cousins joined the meeting in progress.

Executive Director, Susan Kane, Michael Ribble and Matthew Staback, Actuarial Representatives and Attorney Representative, Matt Gierse, were also in attendance.

II. APPROVAL OF MINUTES FROM LAST MEETING

Sheila Goodwin made a motion, seconded by Bobbie Richardson, to approve the minutes of the Board of Trustees Meetings on October 27, 2021.

A roll call vote was taken.

Angela Banks	Yes	Antionette Cousins	Yes	Louis Cross	Yes
Sheila Goodwin	Yes	Donna Jones	Yes	Yvette Levy	Yes
Bobbie Richardson	Yes	Albert Sanders	Yes	Justin Stein	Yes
Dorris Walker	Yes				

The motion carried with ten yes votes.

III. READING OF COMMUNICATIONS TO THE BOARD OF TRUSTEES

None

IV. PRESENTATIONS BY INTERESTED PARTIES

None

V. CONSENT AGENDA

Sheila Goodwin made a motion, seconded by Bobbie Richardson, to approve the Retirements and Benefits of November and December 2021. A roll call vote was taken.

Angela Banks	Yes	Antionette Cousins	Yes	Louis Cross	Yes
Sheila Goodwin	Yes	Donna Jones	Yes	Yvette Levy	Yes
Bobbie Richardson	Yes	Albert Sanders	Yes	Justin Stein	Yes
Dorris Walker	Yes				

The motion carried with ten yes votes.

Sheila Goodwin made a motion, seconded by Bobbie Richardson, to approve the Retirements and Benefits of October and November 2021. A roll call vote was taken.

Angela Banks	Yes	Antionette Cousins	Yes	Louis Cross	Yes
Sheila Goodwin	Yes	Donna Jones	Yes	Yvette Levy	Yes
Bobbie Richardson	Yes	Albert Sanders	Yes	Justin Stein	Yes
Dorris Walker	Yes				

The motion carried with ten yes votes.

VI. UNFINISHED BUSINESS

The Executive Director mentioned that the PSRS office currently remains closed to the public but that the status will continue to be reviewed and decisions on the office status made based on the unfolding developments with the pandemic.

VII. REPORT OF THE CHAIRPERSON

The Chairman began by expressing gratitude that the Board was moving in a positive direction. He thanked the Co-Chairs of the Personnel and Professional Contracts Committee on the recent selection of the new Investment Consultant. He also thanked the Trustees for their time and attendance at the many meetings conducted in 2021. He also mentioned that Trustee Bobbie Richardson had been re-elected as a non-Teacher Trustee for a four-year term and Angela Banks had been re-appointed by the St. Louis Board of Education for a four-year term, both ending December 31, 2025.

The Chairman announced that at this time there would be elections for 2022 Board of Trustees Chairperson and Vice-Chairperson. He called first for nominations of Chairperson. Sheila Goodwin nominated Louis Cross. The nomination was seconded by Christina Bennett. Board Chair Cross asked multiple times if there were any additional nominations. Since there were no additional nominations, Trustee Cross was re-elected by acclamation. Chairman Cross thanked the Board for their support.

Board Chair Cross then moved on to nominations for Vice Chairperson. Dorris Walker nominated Bobbie Richardson. This nomination was seconded by Sheila Goodwin. There were no additional nominations after Chair Cross asked multiple times for any further nominations. Trustee Richardson was deemed re-elected to Vice Chairperson by acclamation and also thanked the Board for their support.

VIII. REPORT OF THE EXECUTIVE DIRECTOR

The Executive Director began by highlighting the materials included in Tab IV which were copies of the Contribution letters sent to St. Louis Public Schools and the Charter Schools along with the GASB 68 report. She then moved to the proposed 2022 meeting schedule. The proposed dates were based on the normal schedule of the third Monday of the month with the exception of the February meeting being moved to the fourth Monday due to the President's Day Holiday. Motion was made by Trustee Bennett, seconded by Bobbie Richardson, to adopt the 2022 Meeting Schedule, subject to St. Louis Public Schools calendar.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes	Bobbie Richardson	Yes	Albert Sanders	Yes
Justin Stein	Yes	Dorris Walker	Yes		

The motion carried with eleven yes votes.

The Executive Director then mentioned that during the Committee reports, the Board would review the 2022 Operating Budget. While the Business Insurance recommendations are included in the Budget, she reviewed this piece in more detail during her report. Business insurance included Worker's Compensation, Property and Cyber liability. Gallager, the System's Business Insurance consultant, was continuing to review and seek more quotes for Cyber liability but had received a firm renewal premium from the current carrier. The motion to renew the Business Insurance policies would be covered during the Committee reports.

IX. REPORT OF THE INVESTMENT CONSULTANT

None

X. REPORT OF THE ACTUARY

Michael Ribble and Matthew Staback from Buck Consulting were present to review the five-year Experience Study. Mr. Ribble began by explaining that it is best practice to review the assumptions that are used for the Valuation every five years and is a requirement for the System. The Report was reviewed and the Actuary representatives responded to a number of questions from the Trustees. The topic of providing a COLA to members was brought up during this discussion. The Attorney Representative explained that public plans in Missouri must be 80% funded and Buck must also certify that the plan is actuarially sound before a COLA can be granted. Attorney Representative said that a letter had been sent to Trustees about this issue some years ago. The Executive Director will send this out to all board members.

After discussion was concluded, Trustee Bennett made a motion, seconded by Trustee Cousins, to adopt the five-year experience study and recommendations from the Actuary to implement changes in the Actuarial Methods, Mortality Assumptions, Demographic Assumptions, and Investment Return Assumptions.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes	Bobbie Richardson	Yes	Albert Sanders	Yes
Justin Stein	Yes	Dorris Walker	Yes		

The motion carried with eleven yes votes.

XI. REPORTS OF COMMITTEES OF THE BOARD OF TRUSTEES

The Chairman asked for reports from the Committees.

Benefits Committee

While there was no report, the Chairman thanked Co-Chairs Jones and Richardson for their work in the benefits package offered to retirees during the recent open enrollment.

Trustee Business Committee

Trustee Business Committee Co-Chair Walker made a motion to approve the 2022 Operating Budget as recommended and accepted by the Trustee Business Committee at its meeting on December 8, 2021. Bobbie Richardson seconded the motion.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes*	Bobbie Richardson	Yes	Albert Sanders	Yes
Justin Stein	Yes	Dorris Walker	Yes		

^{*}Trustee Levy's yes vote was made through phone call with Chairman Cross. The motion carried with eleven yes votes.

Trustee Business Committee Co-Chair Goodwin made a motion to accept the renewals of the Worker's Compensation and Property Liability Coverage with Hartford, and the Cyber Liability Policy renewal as recommended by Gallagher. Motion was seconded by Bobbie Richardson.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes*	Bobbie Richardson	Yes	Albert Sanders	Yes
Justin Stein	Yes	Dorris Walker	Yes		

^{*}Trustee Levy's yes vote was made through phone call with Chairman Cross. The motion carried with eleven yes votes.

Trustee Business Committee Co-Chair Goodwin made a motion to enter into a three-year agreement from January 1, 2022 through December 31, 2024 with PBI Research Services for Death Audit Services at an annual cost of \$12,000.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes*	Bobbie Richardson	Yes	Albert Sanders	Yes
Justin Stein	Yes	Dorris Walker	Yes		

^{*}Trustee Levy's yes vote was made through phone call with Chairman Cross. The motion carried with eleven yes votes.

Investment Committee

No report.

Legislative, Rules & Regulations Committee

No report.

Personnel & Professional Contracts Committee

Co-Chair Banks asked the Executive Director for an update on the Investment Consultant transition. The Executive Director reported that an agreement had been signed and that the Managers had been informed of the transition.

XII. NEW BUSINESS

None

XIII. REPORT OF THE ATTORNEY

The Attorney did have a report but suggested that it be conducted in closed session. Albert Sanders made the motion to close the meeting, and that all records and votes, to the extent permitted by law, pertaining to and/or resulting from this closed meeting be closed under R.S.Mo. §§ 610.021 (1) for the purpose of having a confidential or privileged communication with the Attorney. Antionette Cousins seconded the motion.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Donna Jones	Yes
Yvette Levy	Yes*	Bobbie Richardson	Yes	Albert Sanders	Yes
lustin Stein	Ves	Dorris Walker	Ves		

^{*}Trustee Levy's yes vote was made through phone call with Chairman Cross. The motion carried with eleven yes votes.

The meeting continued in closed session.

After the closed meeting discussion, Sheila Goodwin motioned to open the meeting pursuant to R. S. Mo. §610.021. The motion was seconded by Bobbie Richardson.

A roll call vote was taken.

Angela Banks	Yes	Christina Bennett	Yes	Antionette Cousins	Yes
Louis Cross	Yes	Sheila Goodwin	Yes	Yvette Levy	Yes
Bobbie Richardson	Yes	Albert Sanders	Yes	Justin Stein	Yes
Dorris Walker	Yes				

The motion carried with ten yes votes.

XIV. ADJOURNMENT

Sheila Goodwin made a motion, seconded by Bobbie Richardson, to adjourn the meeting. By voice vote, motion carried, and the meeting adjourned at around 6:35 p.m.

Presentation to the Board of Trustees

2021 Experience Study

December 13, 2021

Contents

- Background
- Economic Assumptions
- Demographic Assumptions
- Actuarial Methods
- Cost Effects of Proposed Assumptions and Methods
- Actuarial Certification

Background

Background

- The last experience study was completed in 2016
- The current experience study covers the experience for the 5-year period January 1, 2016 to December 31, 2020
- New assumptions adopted by the Board of Trustees will be effective beginning with the January 1, 2022 valuation
- The experience study covers economic assumptions, demographic assumptions, and actuarial methods
- Setting assumptions is a blend of art and science
- The process is a collaborative effort, including input from the actuary, investment consultant and other stakeholders, using past experience and future expectations to develop proposed assumptions for the Board of Trustees to adopt

Background (cont'd)

- Each assumption used in the valuation should represent the actuary's best estimate of reasonable long-term expectations
- An assumption is considered reasonable if it is not anticipated to result in significant cumulative gains or 0
- The economic assumptions should be internally consistent with each other 0
- Each assumption should be evaluated considering its materiality on the valuation results 0
- Typically, a range of reasonableness applies for each assumption

0

- Past experience should be considered, but not given undue influence if future expectations differ
- The cost impact is shown in this presentation as if the proposed new assumptions were used in the January 1, 2021 valuation

Background (cont'd)

- professional judgment, may reasonably be anticipated to significantly affect the plan's future financial Actuarial Standard of Practice No. 51 (ASOP 51) requires the actuary to identify risks that, in their
- The more significant risk factors affecting future funded ratios and contribution rates of the plan are:
- Investment Risk the risk that future investment returns will be different than the assumed rate
- Contribution Risk the risk that the actuarially determined contribution is not deposited to the trust each year
- Longevity Risk the potential that mortality rates of participants and beneficiaries will be different than assumed
- Other Demographic Risk the potential that non-mortality demographic patterns will be different than assumed
- The Plan's full ASOP 51 disclosure can be found in Section 4 of the 2021 Valuation Report dated June 2021
- annual actuarial valuations should be changed to better match future experience, thereby managing these An experience study is performed every five years to assess whether the assumptions being used in the risk factors

Investment Return, Inflation and Salary Increase Economic Assumptions –

Things That Happen to Money (Economic Assumptions)

- ➤ KNOWN at valuation date:
- 1. Market value of Fund assets
- 2. Composition of Fund assets

 - Stocks Bonds Short term
- Long term International
 - Real estate
- Alternative investments

- ➤ ASSUMED at valuation date:
- 1. Future rates of investment return
- 2. Future rates of inflation
- 3. No change in composition of Fund assets

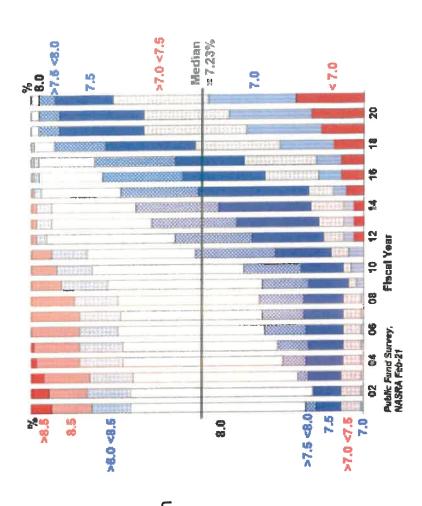

Investment Return

- The investment return assumption represents the expected return on invested assets
- The investment return assumption is used to discount projected benefits for all active and inactive members to determine the plan's liabilities
- A change in this assumption generally has the biggest impact on the plan's liabilities
- Factors to be considered in setting the investment return assumption
- The plan's investment policy and asset allocation strategy
- Capital market assumptions in effect at the time of measurement
- Risk preference of the Board
- Investment expenses

Investment Return (cont'd)

- NASRA public fund survey for FY21 released in February 2021 captures a median assumed rate on investment return for responding funds of 7.23%, which was slightly lower than 7.25% from prior year; lower recent rates may reflect:
- Medium to long-term expectations for rate of return are lower than in the past
- Sponsors are beginning to introduce some additional margin of conservatism in reaction to emerging events over the recent past
- NCPERS study released in January 2021 shows a slight increase in the average assumed rate on investment return for responding funds from 7.24% from prior year to 7.26%

2

Investment Return (cont'd)

Investment Return Assumption (continued)

Inflation Component

- Current long-term assumption is 2.75%
- NEPC 30-year expected inflation is 2.2%
- Various measures for the rate of inflation; not much published data beyond 10 years
- NCPERS 2020 Public Retirement Systems Study shows a 2.7% inflation rate average
- □ 138 pension plans included in study
 - □ 0.1% lower than prior study
- Midpoint of the 75-year Social Security Administration projection is 2.4%
- Average 10-year, 20-year and 30-year CPI-U increases of 2.4%, 2.3% and 2.5%
- Philly Fed's 10-year expectation is 2.55% (November 2021)

Investment Return (cont'd)

Recommendation:

- Recommend the Board lower the investment return assumption from 7.50% to 7.00%, net of investment expenses based on the following building blocks:
- 2.50% inflation, plus
- 4.50% real return on assets

Salary Increase

Things That Happen to Members – Salary Increases (Economic Assumptions)

Total \$247,698

Projected 3-year average

\$247,698/3 = \$82,566

Salary Increase

- · Salary increase is the assumed rate of future annual salary increases for employees
- Current salary increase assumption:
- 5.00% per year for the first 5 years of service and 3.00% per year after the first 5 years of service
- Buck reviewed salary experience during the experience study period with and without 2020
- Buck reviewed 2020 average salary based on service interval of fives to determine estimated salary increase required to move to the next service interval

Historical Plan Data – Average Salary Increases

The Art San		THE PARTY SERVICES	
Population	Actual Salaries	Expected Salary	Actual/Expected
5,665	277,752,869	283,488,515	0.9798
2,220	123,030,648	124,543,414	0.9879

711	44,449,325	44,775,881	0.9927
510	31,942,979	32,345,978	0.9875
384	27,114,626	27,362,815	0.9909
13,140	712,414,202	723,164,509	0.9851

*Historical plan data excludes 2020 pay data in analysis.

Salary Increase

- · Recommendation:
- o Since the methods reviewed provided no evidence of significant deviation of actual experience from the assumed rates of salary increases, we recommend no change to the salary increase assumption

Demographic Assumptions

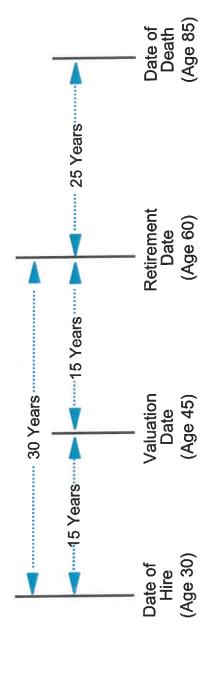

Things That Happen to Members (Demographics Assumptions)

➤ KNOWN at valuation date:

- 1. Age
- 2. Gender
- 3. Service to date
- 4. Occupation

► ASSUMED at valuation date:

- 1. Retirement rate(s)
- 2. Death rates before and after retirement
- 3. Disability rates
- Termination rates

Process for Demographic Assumption Review

- Includes a five-year review of the following assumptions:
- Mortality
- Retirement
- Withdrawal
- Disability
- Data collected from January 1, 2016 to December 31, 2020
- Compare past experience ("actual") with assumptions ("expected")
- More about Actual to Expected (A/E) ratios on the following slide
- Determine trends
- Consider any external factors
- Make judgements about the future
- Recommend adjustments, as needed

A/E Ratios

- A/E ratios are used to analyze recent demographic experience
- A = actual experience
- E = expected experience
- An A/E ratio of 100% suggests the assumption matches recent experience
- assumption is "too conservative" or "not conservative enough" relative to recent experience. Using Depending on the assumption, an A/E ratio greater or less than 1.0000 indicates if the current retirement rates as an example:
- An A/E ratio for retirement rates that is greater than 1.0000 indicates that higher actual number of retirements occurred over the observation period than the current assumption for retirement rates predicted
- In such cases, higher rates of assumed retirement rates may be warranted
- assumptions are developed the new A/E will usually still not be exactly 1.0000 to account for partial When deciding upon proposed assumptions the credibility of the experience is considered. A large number of exposures are needed to create fully credible experience. Therefore, when proposed credibility of the experience.
- A/E ratios reviewed based on employees from January 1, 2016 through January 1, 2021. Assumptions recommended to be reflected in the January 1, 2022 valuation.

Mortality Assumption

- · The mortality assumption is used to project the life expectancy of each participant in the plan. It includes:
- An underlying base table with mortality rates that vary by age and gender
- An assumption regarding future mortality improvement
- Current base mortality tables are the RP-2014 tables based on a study performed by the Society of Actuaries
- RP-2014 tables are based on private sector data
- The mortality rates for inactive participants receiving benefits (non-disabled) are increased by 10%
- All mortality rates projected from 2006 using generational improvement with Scale MP-2015, as developed by the SOA

Mortality Assumption, continued

- In 2019, the SOA released the Pub-2010 tables based on a study of public plan participant data
- Based on observations on the following slides, the following variations to Pub-2010 tables provided a closer fit to actual PSRSSTL experience during 2016 to 2020:
- General employee mortality tables
- Below median adjustment
- Amounts-weighted basis
- The amounts-weighted number of observed deaths for healthy male and female retirees deemed these groups to be "partially credible"
- Partial credibility results in a partial adjustment to the base Pub-2010 mortality tables to fit PSRSSTL actual observed experience by increasing or decreasing mortality rates across all ages by a factor
- Male retirees result in an adjustment of 102% of selected Pub-2010 retiree table for males
- Female retirees result in an adjustment of 110% of selected Pub-2010 retiree table for females
- No other groups (active, terminated, disabled retirees and beneficiaries of deceased retirees) had enough observed deaths to warrant a credibility adjustment

Mortality Projection scale

- In the 2016 experience study, the Board adopted the Society of Actuary's latest mortality improvement scale (MP-2015)
- Currently, all mortality rates projected from 2006 using generational improvement with Scale MP-2015
- Each year, the Society of Actuaries releases an updated mortality improvement scale
- Some systems update mortality improvement scales each year
- However, since PSRSSTL consistently performs regularly experience studies, updating the mortality improvement scale upon each study rather than annually is an acceptable and common practice
- In October 2021, the Society of Actuaries released updated mortality improvement Scale MP-2021
- Recommendation
- Board adoption of updated mortality improvement scale MP-2021 with all applicable Pub-2010 mortality rates projected from 2010 using generational improvement

OC

Mortality Assumption - Current and Proposed

We propose the following changes to the mortality assumption:

Proposed	Base Table* Load Mortality Improvement	PubG-2010 (Below Median) N/A MP-2021 Mortality Table	PubG-2010 (Below 2% MP-2021 Median) Mortality Table	PubG-2010 (Below 10% MP-2021 Median) Mortality Table	PubG-2010 (Below N/A MP-2021 Median) Mortality Table	PubT/G-2010 Mortality N/A MP-2021 Disability Table

Curr	Base Table	RP-2014 Combined Healthy Mortality Table (rolled back to 2006)	RP-2014 Disabled Mortality Table (rolled			
Group		Active & Deferred Vested Participants	Retirees - Male	Retirees - Female	Beneficiaries	Disabled Participants

^{*}Base tables are amount weighted.

Retirement Rates

- The retirement assumption is used to project the ages at which current active participants are expected to retire
- Different age-based rates apply to those who will be eligible for unreduced vs. reduced retirement benefits
- Eligibility for reduced and unreduced retirement is summarized in the table below:

- The graphs on the following slides in this section show the average retirement counts and rates over the last 5 years
- Actual
- Expected current assumptions
- Proposed proposed assumptions

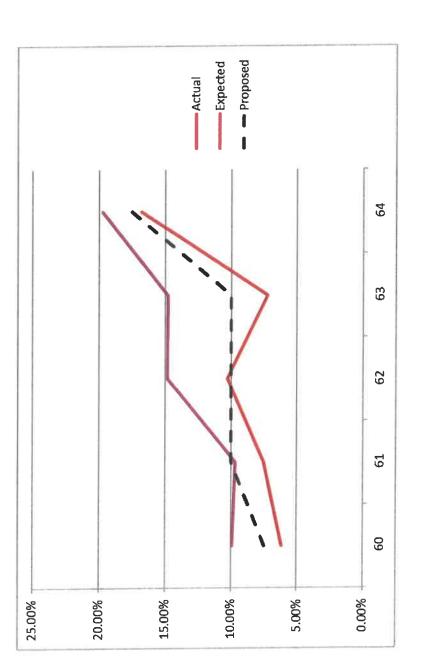

Retirement Rates - Actual vs. Expected

Not Rule of 80 and Under Age 65

Withdrawal Rates

Withdrawal Rates

- The withdrawal assumption is used to project the ages at which current active participants are expected to terminate employment
- If a participant terminates before becoming vested (5 years of service), they are entitled to receive a refund of their accumulated contributions with interest. If termination occurs after 5 years, the individual is entitled to a deferred retirement benefit.
- The current withdrawal assumption is a "select and ultimate" assumption
- Higher withdrawal rates are used for each of the first 5 years of service
- After 5 years, the withdrawal rates gradually decline by age
- The graphs on the next two slides show the average withdrawal counts and rates over the last 5 years
- Actual
- Expected current assumptions
- Proposed proposed assumptions

Disability Rates - Male

Proposed 646/	Current.	11 AS	13.12	7	6.576
Proposed	Current	Proposed	Current	Disablements	Population
Expected	Actual/Expect	ected Disablements	Expected D	Actual	

- Small sample size results in limited credible data
- In general, males experience a lower rate of disability at later ages than anticipated
- We propose minor adjustments to better fit experience

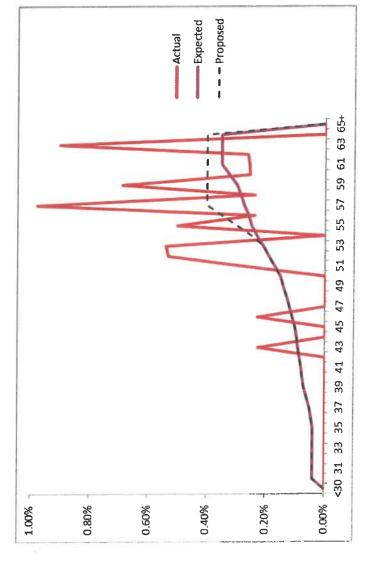

Disability Rates

- The disability assumption is used to project the ages at which current participants are expected to become disabled.
- If a participant becomes disabled, they are entitled to receive an unreduced benefit upon date of disablement. This benefit is fixed to not be greater than the amount the participate would have received at NRD had they continued to work until retirement, nor less than 25% of Average Final Compensation.
- The graphs on the next two slides show the average disability counts and rates over the last 5 years

Deferred Vested

- This assumption estimates the amount of liability for deferred vested members with no benefit information provided in the employee data by the System.
- Current assumption assumes 150% of the member contributions with interest, as of the valuation date, will reasonably estimate the actual liability for the member if benefit information was provided.
- Buck examined projected retirement benefit information estimated in the deferred vested statements provided annually.
- These benefits are subject to verification at the time of retirement.
- However, the statements provide a good representation of the amount of benefit a member may receive at normal retirement date based on available information.
- A sample of roughly 75% of the deferred vested population from the 1/1/2021 valuation was reviewed.
- The actual versus expected liability was estimated to be greater than 100% but significantly less than 150%
- Estimate did not include pre-retirement death benefits or any subsidy provided by Rule of 80 or 85 eligibility

Recommendation:

Recommend the Board decrease the assumption from 150% to 125% of the member contributions with interest.

Participant Account Interest Crediting Rate

82

Participant Account Interest Crediting Rate

- Member contributions are credited with an annual interest crediting rate
- For active employees, interest is credited during employment
- For non-vested terminations, interest is credited until a refund of contributions is requested
- For vested terminations, interest is credited until the earlier of a refund of contributions is requested or the participant elects to commence annuity payments
- For participants electing to commence annuity payments
- No refund of contributions is provided
- If the retiree dies prior to receiving total annuity payments at least equal to participant's contribution balance with interest, then the balance not receives is payable to the beneficiary or estate
- The interest crediting rate is a plan provision
- This is not an actuarial assumption and thus, not officially part of this experience study
- The current interest crediting rate is 5.0%
- The PSRSSTL Board of Trustees has authority to update the crediting rate from time to time

Participant Account Interest Crediting Rate

- Considerations when establishing an interest crediting rate:
- Plan's ability to earn investment returns to fund the annual crediting rate
- Plan's objectives to incentivize members to keep contributions in the plan versus requesting a refund of contributions
- The affected population
- Type of interest crediting rate
- Fixed percentage
- X% of actual rate of return on plan assets earned during prior year
- CPI (6.2% for 12-month period ending October 2021, 3.2% for a 5-year average, 2.4% for a 10-year average)
- 30-year treasury rate (2.06% as of October 2021)
- Option to cap or floor the interest crediting rate if a variable rate (e.g., not less than 0%)
- Whether interest should be credited for participants who terminate employment prior to retirement
- May have different approach for vested vs. non-vested terminations

Actuarial Cost Method - Current

Frozen Entry Age Actuarial Cost Method

- On the plan's initial actuarial valuation date for which the cost method is used, the annual cost of accruals are determined as a level percentage of pay for each year from entry age until retirement or termination.
- Unfunded Frozen Actuarial Accrued Liability (UFAAL) was originally determined as of January 1, 1981.
- Effective January 1, 2006, the UFAAL was reset
- The UFAAL is only frozen in that it is not adjusted due to experience gains and losses.
- Instead, these gains and losses are reflected through changes in the normal cost accrual rate.
- The UFAAL does change, increasing due to interest and additional normal costs, and decreasing due to contributions.
- Any changes to plan provisions or actuarial assumptions results in a change to the UFAAL.
- Funding Requirement is the sum of the following components
- Normal cost contribution
- Actuarial accrued contribution: payment required to amortize the UFAAL over a closed 30-year period from January 1, 2006
- 15 years remaining as of January 1, 2021

Actuarial Cost Method - Proposed

- Implement the actuarial cost method of Entry Age Normal cost method
- Definition: A cost method under which the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated in a manner that produces a level annual cost over the earnings of the individual between entry age and assumed retirement age
- The cost allocated to the current fiscal year is called the Normal Cost
- Benefits of the Entry Age Normal cost method
- Benefits are projected and spread so that Normal Cost will be a level percentage of compensation from date of hire to assumed date of retirement (or if earlier, withdrawal, disability or death)
- Consistent with method required by accounting standards under GASB 67 and 68
- Allows for easier communication of the plan's funded ratio (actuarial value of assets over actuarial accrued liabilities)
- Limits the plan's volatility compared to other cost methods

Recommendation:

Recommend the Board to approve the move from Frozen Entry Age to Entry Age Normal cost method

Amortization Method

- Amortization methods determine the payment schedule for unfunded actuarial accrued liability (UAAL) (i.e. the difference between the actuarial accrued liability and actuarial value of assets)
- Actuarial Funding Policies and Practices for Public Pension Plans published by the Conference of Consulting Actuaries provided best practice recommendations when establishing amortization methods under a Plan's cost method
- When the paper was published, acceptable practices includes a 25-year layered amortization method
- However, there has been a trend over the past several years of lowering the number of years in the amortization period to 15 or 20 years
- Under the proposed Entry Age Normal actuarial cost method, amortization payment is determined as a level dollar amount, similar to a mortgage payment
- Under layered amortization, incremental increases or decreases in UAAL are amortized over a new period
- The original UAAL amortization would be established as of January 1, 2022
- New layers would include impact of actuarial gains and losses, assumption changes and plan amendments
- Layered amortization mitigates volatility of a large fluctuation in one year

Amortization Method, continued

Recommendation:

20-year, level dollar, closed amortization period with layered amortization for future changes

- Initial UAAL in the 2022 valuation will be amortized over a 20-year period
- Similar to a house mortgage, the dollar amount will remain level for 20 years
- Initial UAAL would be paid off in 20 years
- Incremental increases or decreases in UAAL in future valuation will be amortized over a new 20-year period
- New layers would include impact of actuarial gains and losses, assumption changes and plan amendments
- Layered amortization only works in conjunction with closed amortization periods

Employer Contributions – interest adjustment

- Employer contributions are based on actuarially determined contributions needed for the Plan to be sustainable in the long term
- o Employer annual cost composed of a normal cost and amortization payment, reduced by expected employee contributions
- Actuary determines the employer's annual cost as of the valuation date (January 1)
- Total employer costs then expressed as a percentage of expected payroll for the calendar year of the valuation
- No interest adjustment is applied to the dollar cost based on timing of actual contributions

Recommendation:

o Recommend the Board apply an interest adjustment of one-half year's interest at the valuation interest rate to better reflect the timing of contributions

Actuarial Value of Assets - Current

- Currently, the plan uses the assumed yield method of valuing assets
- appropriate adjustments for contributions and disbursements to produce an expected AVA at Prior year's actuarial value of assets (AVA) is increased at the assumed rate of return with the end of the year. 0
- Expected AVA is compared to the market value of assets (MVA) less the expense and contingency reserve 0
- 20% of the difference is added to the expected actuarial value
- Method was established as of January 1, 2006 and set equal to the MVA
- In the event the plan experiences no gains or losses in the future, the Plan's AVA will never fully return to the Plan's MVA

Actuarial Value of Assets - Considerations

- An asset smoothing method should reduce the effect of short-term market volatility while still tracking the overall movement of the market value of assets (MVA)
- The plan's asset smoothing method should have clear objectives:
- Amount of return subject to smoothing based on total return gain/loss for a given year
- Smoothing period: Longer smoothing periods generally reduce contribution volatility
- Corridors help constrain the actuarial value of assets (AVA) to not exceed a certain threshold from market value of assets
- · Recommend the Board adopt the following policy:
- Set actuarial value of assets equal to market value of assets (less contingency reserve) as of January 1, 2022
- Five-year smoothing of assets based on the difference between the actual investment income and the expected income for 2022 and later years
- Limit the actuarial value of assets to not less than 80% and not greater than 120% of the market value of assets (less contingency reserve)

Cost Effects of Proposed Assumptions

Demographic

	Current		Assumptions	Mortality	Investment Return
	Assumptions	Actuarial Methods	Excluding Mortality	Assumption	Assumption
1. Entry Age Normal Actuarial Accrued Liability (AAL)	1,257,782,934	1,257,782,934	1,239,646,172	1,219,692,824	1,274,069,463

12. Total Employer Cost as % of Covered Payroll	17.1%	16.2%	15.0%	14.1%	16.6%

*Results calculated based on methods and assumptions in effect as of January 1, 2021 valuation.

**Results use a building block approach for each scenario. For example, the scenario titled "Demographic Assumptions Excluding Mortality" implements the proposed demographic assumptions excluding mortality discussed in the presentation with the proposed demographic assumptions excluding mortality discussed in the presentation with the proposed demographic assumptions excluding mortality discussed in the presentation with the proposed demographic assumptions.

Actuarial Certification

Use of Models

Actuarial Standard of Practice No. 56 ("ASOP 56") provides guidance to actuaries when performing actuarial services with respect to designing, developing, selecting, modifying, using, reviewing, or evaluating models. For this presentation, Buck used the

- internally developed and third party model to compare actual versus assumed experience and determine proposed assumptions to use for valuing the liabilities in the third-party software
- models to analyze and propose investment returns as previously described in this presentation
- third-party software to calculate the liabilities associated with the plan based on current and proposed assumptions
- an internally developed model that applies applicable funding methods and policies to the liabilities derived from the output of the third-party software and other inputs, such as plan assets and contributions, to determine the contribution rates

investigated. Other outputs and the internal model are similarly reviewed in detail and at a high level for accuracy, reasonability and presentation are checked and reviewed by experts within the company who are familiar with applicable funding methods as well as consistency with prior results. The models used for annual valuations are used for this presentation and any adaptations for this detailed sample output, changes from year to year are summarized by source, and significant deviations from expectations are Buck has an extensive review process for annual valuations whereby the results of the liability calculations are checked using the manner in which the model generates its output. If significant changes are made to the internal model, extra checking and review are completed.

72

Actuarial Certification

The purpose of this presentation is to provide the Board of Trustees with an analysis of proposed changes to the assumptions and methods that are used in the actuarial valuations of the Public School Retirement System of the City of St. Louis pension plan.

The cost effects of the proposed assumptions are based on the January 1, 2021 actuarial valuation.

Please see the January 1, 2021 actuarial valuation report for a more detailed description of the risk factors related to future funding of the plan (ASOP 51),

anticipated by the economic and demographic assumptions, increases or decreases expected as part of the natural operation of Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that the methodology used for these measurements, and changes in plan provisions or applicable law.

Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. These results have been The results were prepared under the direction of Michael Ribble and Matthew Staback, both of whom meet the Qualification prepared in accordance with all applicable Actuarial Standards of Practice.

RE:

2022 PSRSSTL Proposed Operating Budget

The following is the 2022 proposed operating budget for the Public School Retirement System of the City of St. Louis for your review and discussion at the Trustee Business Committee Meeting on December 8, 2021. Overall, the proposed budget is about 5% higher than the 2021 approved budget. Increased expenditures are highlighted below along with some accomplishments achieved by PSRSSTL during 2021.

2021 Accomplishments

Professional Services

Conducted RFP's for Actuarial and Investment Consultant Services resulting in service enhancements and cost decreases

Conducted RFP's for Dental and Vision Services resulting in additional benefits being added at reduced premium

General Administration

Utilized free resources for death audit services, resulting in earlier detection of deceased Members

Implemented a Document Retention Policy

Redesigned the newsletter, offering targeted content for Actives and Retirees

Offered virtual retirement seminars and open enrollment sessions

Property Management

Added recycling and consolidated pickup schedule which lowered monthly cost.

Property Management, continued

Implemented new lower cost phone system, with improved features

Final Page 2 of 11 December 13, 2021

Completed maintenance projects, such as paving of the parking lot.

2022 Budget Highlights

- Fees for Investment Managers are based on the fund balance and types of investments. These fees are projected to increase from 2021 but are based on investment performance, which is difficult to accurately predict. The Investment Management fees, based on the portfolio as of September 30, 2021, are a nearly \$300,000 increase from the prior year and are the largest line item increase in the proposed 2022 budget.
- Proposed Expenses for Technology and Equipment Maintenance & Purchases are also an increase from 2021. This is primarily due to continued security testing and enhancement, change in death audit services to a new provider offering a broader level of service, and providing devices for Trustees to use for Board related activity.
- The premiums for business insurance may also increase. The Insurance consultant has recommended increasing Cyber Liability policy limits from \$1,000,000 to \$2,000,000 so additional costs have been requested in this category to cover the anticipated additional premium if coverage is approved.
- In the Legal Services area, there is an additional request of \$50,000 for advocacy and research services. This will be needed if proposed legislation to address the System funding is introduced in the 2022 Missouri legislative session.
- The Auditing/Accounting Services line item has been increased by \$25,000. This funding is needed for the cost for a payroll service to handle PSRSSTL staff payroll and tax filings. Currently, this is being managed internally via a spreadsheet.
- Funding for three Special Project items have been requested for 2022. The automatic, preferably handsfree, door opener project for the main entrance was not completed in 2021 due to difficulties in obtaining materials but this is expected to be completed in 2022. The awning over the balconies in the back of the building has been severely damaged by weather and needs replacement. There are also areas of the building, such as the Boardroom and the balcony railings that need painting.
- Items with a decrease in expenditure expected in 2022 include Actuarial Services, Trustee Elections (only one scheduled election in 2022), Postage, and Retiree Insurance and Consulting, primarily due to decreased premiums obtained from the 2021 Dental and Vision RFP.

Thank you for your review and consideration of the proposed budget.
